Lustre

A series of 4 pendant shades, Lustre is the first stoneware object in the collection. The iridescent sheen is created using a top secret glaze containing minerals and precious metals. The end result is a striking colour change effect reminiscent of peacock feathers or oil slicks on water.

The handmade process results in a totally unique and unrepeatable finish for each individual object. No two shades look the same because the glaze fixes to the stoneware in an unpredictable way. This produces a wide spectrum of colour across each light, ranging from a pale lime to a deep bottle green.
