Tom Dixon is on a mission to design, illuminate and furnish the future with innovative lighting, furniture and accessories of longevity, simplicity and a materiality inspired by Britain's unique heritage.

The archetypical British members' club is reworked into a contemporary version – a modern day home-away-from-home, a plush and cultured haven where pleasure and work collide. Our trademark metallic finishes are resplendent in the new typologies of task and pendant lights, tables and barware. Sharp angular geometries are contrasted with a sculptural softness to create complete environments.

Flood p16

FLOOD

An ode to optical engineering, Flood boasts a strong profile and takes inspiration from the automotive industry's technical mastery – its lineage comes clearly from the modern car headlamp. Made from injection-moulded polymers, the result is a robust and highly reflective object which incorporates a polycarbonate lens and a removable dimmable LED.

Y CHAIR

A product which balances the three most important requirements demanded of a contract chair: durability, a striking silhouette and an ergonomic form. The Y Chair's expressive shape is glass-reinforced nylon (PA6-GF30) which means that the material can be recycled, is fatigue resistant and absorbs shock and load through its flexibility.

BOUNCE TABLE TOP

A tactile table top made from durable polyurethane, the Bounce Table Top comes in two sizes and two different finishes – a plain black top and with an enamel insert. The enamel – an archetypal industrial material made in the factory that still produces the iconic London Underground station signs – adds a vibrant pop of colour. The plain black top is made from integral skin foam and formed in an open mould process. The Bounce Table Top works well on any of our table bases.

Y BASE

The four-legged base from the Y Chair shows dual functionality as it forms the basis for the feet of the table. An ideal café table, it can also be used with any of our smaller table tops. For indoor and outdoor use.

BELL

Bell pendant is an exercise in reductionism. A generous and luminous object with a polished mirror surface that takes on the colours and characteristics of its surroundings, Bell is our continued exploration into the ultra-reflective. Formed from pressed chrome plated steel, the dome is finished with an injection-moulded diffuser giving a soft warm light.

SCENT

Our second olfactory adventure is a celebration of the bare essentials. All four scents are created in a bid to de-mystify the obscure complexities of the most misunderstood of the senses – smell. We took inspiration from the medieval alchemist and Eastern philosopher's quest to reduce all matter to four simple elements. Our minimalist attitude has delivered four scents of extreme simplicity and individual character that reflect their elemental names of Fire, Air, Earth and Water.

Bell p15, Scent p20

Etch p16, Dome p18

TRACE LIGHT

An experiment in the magical effect of moiré patterns, Trace uses a graphic surface pattern which produces a subtle kinetic effect in striped white light. Made from mouth-blown glass, it can be used alone or in multiples to create a cloud of ethereal luminosity.

TRACE TABLE

A graphic collection made from UV-bonded sheet glass. Combining a smoked glass top with ceramic print base detail, the finely printed stripes create an ethereal moiré pattern. Designed for domestic or contract use.

STRIPE

Our exploration of basic geometries and extreme textures now continues into the uncharted territory of floor covering. A pure wool rug hand knotted in two directions and in two heights to give a simple graphic pattern that works well in minimal or decorative interiors. Add a strong graphic presence or a splash of much-needed colour in a minimal way.

Trace Light p17, Trace Table p19, Stripe p19

BASE LIGHT

A new family member for the Base collection, where classically-proportioned and timeless forms are reworked in an industrial process and aesthetic. Combines a super-reflective polished brass shade with a matt-textured cast iron base. With its minimal metallic aesthetic, Base remains an interior design staple and has been used in high-profile locations including Royal Academy of Arts restaurant in London and award-winning Waterhouse hotel in Shanghai.

MIRROR BALL GOLD

Our instantly recognisable lamp was originally inspired by the space helmet and disco balls. An extra level of sophistication is reached in a new gold finish which is created by vaporising a thin layer of pure metal onto the internal surface of a polycarbonate globe. The vacuum deposition process results in a highly reflective gold mirrored surface, which takes on the characteristics of its surroundings. It can be used alone or in multiples to create dramatic features.

BEAT FLOOR & TABLE

Some overdue additions to the popular Beat family, inspired by the sculptural simplicity of traditional water vessels used in India. Both table and floor lights incorporate the familiar hand-beaten shade. A slender articulated arm can be adjusted to direct light. Solid brass componentry and iron sand cast bases create an iconic footprint for any interior.

BEAT PENDANT

An exercise in expressive minimalism, the instantly recognisable pendants are now recoloured in grey with a precious internal silver plate, creating a warm, shimmering glow. Hand-spun by artisan craftsman in Northern India, braised and hand-hammered, each piece is unique and a testament to the time consuming and centuries-old process. Finished in an external matt grey paint.

COG

Super-functional metal accessories, Cog brings precision manufacturing to the home. As we scour factories worldwide, we find ourselves constantly referring to great British engineering. Creating a sense of the tooled and the machined, these pieces are formed in brass-plated solid aluminium. Knurling on each piece allows a firm grip.

Cog p21

Plane p17

PLANE

Plane is characterised by its simplicity and bold geometry: basic silhouettes made from a brass-plated steel frame and a double layered white glass sphere. Plane is an exercise in expressive minimalism and creates a mysterious optical illusion.

SCOOP

Whether used as a dining chair or side chair, Scoop is all about comfort. It is generously proportioned and its scooped shape is designed to hold the sitter in a comforting embrace. The soft form of Scoop is achieved by applying upholstery to an injection-moulded hard foam shell. The copper-plated steel legs create an unusually decorative pedestal for the sculptural form.

PYLON

Inspired by bridges, towers and space frames, Pylon is a structural research project and was initially an attempt at creating the lightest metal chair in the world. These complimentary occasional pieces are semi-transparent and lightweight yet also structurally strong functional sculptures. Combining a hand welded copper-plated steel rod base and a smoked glass top.

SLATE/ STRUT TABLE

Slate is a beautifully simple table base of highly reflective copper-plated steel tubes. Pair with our upholstered Scoop Chairs with matching copper legs. The Slate Table Top is a single solid piece of dark grey slate with chamfered edge detail. The surface is sealed to maintain a dark sleek finish and enhance the natural individuality of the stone.

PIVOT

A series of drawn and sharply upholstered silhouettes, the Pivot collection consists of a high-back chair, a low-back chair and a bar stool – all made with an internal metal frame, moulded foam upholstery and rotating die-cast aluminium base. Taking inspiration from statuesque and sculptural pedestals, Pivot injects a sophisticated exclamation mark into a dining space, café, bar or lobby. Generously proportioned and upholstered in a wide range of fabrics from European textile brand Kvadrat.

PLUM

Plum is a series of barware that brings cocktail culture and drinks traditions into a contemporary universe. Formed from glass and copper, each piece offers an attractive functionality to the restaurant, bar and home. Each glass item is mouth blown and hand cut.
